

**IAS-ICCR Satellite Symposium
June 13, 2018
TORONTO, CANADA**

**VISCERAL ADIPOSITY AND RELATED ATHEROGENIC HYPERTRIGLYCERIDEMIA: FROM ETIOLOGY TO CLINICAL
MANAGEMENT**

Moderators: Yuji Matsuzawa and Jean-Pierre Després

JUNE 13, 2018		
MORNING SESSION		Speaker(s)
08:30-09:15	Visceral obesity: the history of a modifiable risk factor that has finally reached the spotlight	Yuji Matsuzawa Japan
09:15-10:00	Visceral obesity: an update on pathophysiology with a focus of visceral adipose tissue	André Tchernof Canada
10:00-10:15	COFFEE BREAK	
10:15-11:00	Visceral obesity: role of dysfunctional subcutaneous adipose tissue	Ulf Smith Sweden
11:00-11:45	Revisiting the atherogenicity of hypertriglyceridemia in the context of visceral obesity and dysfunctional subcutaneous adipose tissue	Fredrik Karpe UK
11:45-12:30	Lipoprotein metabolism in visceral obesity (mechanistic insights)	Marja-Riitta Taskinen Finland
12:30-13:30	LUNCH	
AFTERNOON SESSION		Speaker(s)
13:30-14:15	Using physical activity as modality to treat/prevent visceral obesity	Robert Ross Canada
14:15-15:00	Targeting nutritional quality to treat/prevent visceral adiposity	Frank B. Hu USA
15:00-15:15	COFFEE BREAK	
15:15-16:00	Molecular targets to manage the hypertriglyceridemic state of visceral obesity	Jean-Charles Fruchart France
16:00-16:45	Pharmacological management of the atherogenic dyslipidemia of visceral obesity	Shizuya Yamashita Japan
16:45-17:30	Visceral obesity: a problem that requires clinical and public health solutions	Jean-Pierre Després Canada
